# Safety Data Sheet

## Section 1 – Identification

**Product Identifier:** Fuel Grade Isobutanol  
**Product Code:** IBF001  
**Synonyms:** See section 16 for complete information  
**Recommended Use:** Motor Fuel, Refinery Blendstock  
**Manufacturer/Supplier:** Gevo Inc.  
345 Inverness Dr. South  
Bldg C, Suite 310  
Englewood, CO 80112  
**General Assistance:** (303) 858-8358  
**Emergency Telephone:** (CHEMTREC USA): 1-800-424-9300

## Section 2 – Hazard(s) Identification

| Physical Hazards: | Flammable Liquids | Category 3 |
| Health Hazards:  | Acute Toxicity – Inhalation | Category 4 |
|                 | Skin Corrosion/Irritation | Category 2 |
|                 | Eye Irritant | Category 2A |
|                 | Specific target organ toxicity – single exposure | Category 3 |

**OSHA Defined Hazards:** Not Classified

**Label Elements:**
- **Signal Word:** Danger
- **Hazard Statement:** Flammable liquid and vapor. Harmful if inhaled (vapor). Causes skin irritation. Causes eye irritation. May cause respiratory irritation. May cause drowsiness or dizziness.

**Precautionary Statement**

**Prevention**
Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces. No smoking. Keep container tightly closed. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparkling tools. Take precautionary measures against static discharges. Wear protective gloves/protective clothing/eye protection/face protection.

**Response**
If exposed or concerned: Get medical advice/attention. If swallowed: Immediately call a poison center/doctor. Do NOT induce vomiting. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. In case of fire: Use AFFF foam, carbon dioxide, dry powder or water fog for extinction.

**Storage**
Store in a well-ventilated place. Keep cool.
Disposal
Dispose of contents/container in accordance with local, regional, national, and international regulations.

Hazard(s) Not Otherwise Classified (HNOC)
None known

Section 3 – Composition/information on ingredients

Section 4 – First-aid Measures

Inhalation
Move to fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. Get medical attention.

Skin contact
Remove contaminated clothing and shoes. Wash off immediately with soap and plenty of water. Get medical attention if irritation develops or persists. Wash clothing separately before reuse. Destroy or thoroughly clean contaminated shoes. If high pressure injection under the skin occurs, always seek medical attention.

Eye contact
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention.

Ingestion
Rinse mouth thoroughly. Do not induce vomiting without advice from poison control center. Do not give mouth-to-mouth resuscitation. If vomiting occurs, keep head low so that stomach content does not get into the lungs. Never give anything by mouth to a victim who is unconscious or is having convulsions. Get medical attention immediately.

Indication of immediate in case of shortness of breath, give oxygen. Keep victim warm. Keep victim under observation. Symptoms may be delayed.

General information
If exposed or concerned: get medical attention/advice. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. Wash contaminated clothing before re-use.

Section 5 – Fire-fighting Measures

Suitable extinguishing media

Unsuitable extinguishing media
Do not use a solid water stream as it may scatter and spread fire.

Specific hazards arising from the chemical
The product is highly flammable, and explosive vapor/air mixtures may be formed even at normal room temperatures. Vapor may cause flash fire. Vapors can flow along surfaces to distant ignition source and flash back. Sensitive to static discharge. Thermal decomposition or combustion may liberate toxic gases or fumes.

Special protective equipment and precautions for firefighters
Wear full protective clothing, including helmet, self-contained positive pressure or pressure demand breathing apparatus, protective clothing and face mask.

Fire-fighting equipment
Wear full protective clothing, including helmet, self-contained positive pressure or
/instructions
pressure demand breathing apparatus, protective clothing and face mask. Withdraw immediately in case of rising sound from venting safety devices or any discoloration of tanks due to fire. Fight fire from maximum distance or use unmanned hose holders or monitor nozzles. Move containers from fire area if you can do it without risk. In the event of fire, cool tanks with water spray. Cool containers exposed to flames with water until well after the fire is out. For massive fire, use unmanned hose holders or monitor nozzles; if this is impossible, withdraw from area and let fire burn. Vapors may form explosive air mixtures even at room temperature. Prevent buildup of vapors or gases to explosive concentrations. Some of these materials, if spilled, may evaporate leaving a flammable residue. Water runoff can cause environmental damage. Use compatible foam to minimize vapor generation as needed.

Specific methods
Use water spray to cool unopened containers.

Section 6 – Accidental Release Measure

| Personal Precautions, protective equipment and emergency procedures | Keep unnecessary personnel away. Local authorities should be advised if significant spills cannot be contained. Ventilate closed spaces before entering. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. See Section 8 of the MSDS for Personal Protective Equipment. Use personal protective equipment. Avoid breathing vapors, mist or gas. Ensure adequate ventilation. Remove all sources of ignition. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas. |
| Methods and materials for containment and cleaning up | Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Stop leak if you can do so without risk. This material is a water pollutant and should be prevented from contaminating soil or from entering sewage and drainage systems and bodies of water. Dike the spilled material, where this is possible. Prevent entry into waterways, sewers, basements or confined areas. Use non-sparking tools and explosion-proof equipment. Small Spills: Absorb spill with vermiculite or other inert material, then place in a container for chemical waste. Clean surface thoroughly to remove residual contamination. This material and its container must be disposed of as hazardous waste. Large Spills: Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Prevent product from entering drains. Do not allow material to contaminate ground water system. Should not be released into the environment. |
| Environmental Precautions: | If facility or operation has an "oil or hazardous substance contingency plan", activate its procedures. Stay upwind and away from spill. Wear appropriate protective equipment including respiratory protection as conditions warrant. Do not enter or stay in area unless monitoring indicates that it is safe to do so. Isolate hazard area and restrict entry to emergency crew. Flammable. Review Fire Fighting Measures, Section 5, before proceeding with clean up. Keep all sources of ignition (flames, smoking, flares, etc.) and hot surfaces away from release. Contain spill in smallest possible area. Recover as much product as possible (e.g. by vacuuming). Stop leak if it can be done without risk. Use water spray to disperse vapors. Spilled material may be absorbed by an appropriate absorbent, and then handled in accordance with environmental regulations. Prevent spilled material from entering sewers, storm drains, other unauthorized treatment or drainage systems and natural waterways. Contact fire authorities and appropriate federal, state and local agencies. If spill of any amount is made into or upon navigable waters, the contiguous zone, or adjoining shorelines, contact the National Response Center at 1-800-424-8802. For highway or railways spills, contact Chemtrec at 1-800-424-9300. |
Section 7 – Handling and Storage

Precautions for safe handling
Keep away from fire, sparks and heated surfaces. No smoking near areas where material is stored or handled. The product should only be stored and handled in areas with intrinsically safe electrical classification.

Conditions for safe storage, including any incompatibilities
Hydrocarbon liquids including this product can act as a non-conductive flammable liquid (or static accumulators), and may form ignitable vapor-air mixtures in storage tanks or other containers. Precautions to prevent static-initiated fire or explosion during transfer, storage or handling, include but are not limited to these examples:

1. Ground and bond containers during product transfers. Grounding and bonding may not be adequate protection to prevent ignition or explosion of hydrocarbon liquids and vapors that are static accumulators.
2. Special slow load procedures for "switch loading" must be followed to avoid the static ignition hazard that can exist when higher flash point material (such as fuel oil or diesel) is loaded into tanks previously containing low flash point products (such as gasoline or naphtha).
3. Storage tank level floats must be effectively bonded. For more information on precautions to prevent static-initiated fire or explosion, see NFPA 77, Recommended Practice on Static Electricity (2007), and API Recommended Practice 2003, Protection Against Ignitions Arising Out of Static, Lightning, and Stray Currents (2008).

Keep away from flame, sparks, excessive temperatures and open flame. Use approved containers. Keep containers closed and clearly labeled. Empty or partially full product containers or vessels may contain explosive vapors. Do not pressurize, cut, heat, weld or expose containers to sources of ignition. Store in a well-ventilated area. The storage area should comply with NFPA 30 "Flammable and Combustible Liquid Code". The cleaning of tanks previously containing this product should follow API Recommended Practice (RP) 2013 "Cleaning Mobile Tanks In Flammable and Combustible Liquid Service" and API RP 2015 "Cleaning Petroleum Storage Tanks".

Section 8 – Exposure Controls/Personal Protection

Occupational exposure limits
US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

<table>

Appropriate engineering controls
Provide adequate general and local exhaust ventilation. Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Use explosion-proof equipment.

Individual protection measures, such as personal protective equipment

Eye/face protection
Wear safety glasses. If splash potential exists, wear full face shield or chemical goggles.

Hand protection
Wear chemical-resistant, impervious gloves. Be aware that the liquid may penetrate the gloves. Frequent change is advisable.

Other
Full body suit and boots are recommended when handling large volumes or in emergency situations. Flame retardant protective clothing is recommended.
Respiratory protection

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workplace exposure limits for product or components are exceeded, NIOSH approved equipment should be worn. Proper respirator selection should be determined by adequately trained personnel, based on the contaminants, the degree of potential exposure and published respiratory protection factors. This equipment should be available for non-routine and emergency use.

Thermal hazards

Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations

Consult supervisor for special handling instructions. Avoid contact with eyes. Avoid contact with skin. Keep away from food and drink. Wash hands before breaks and immediately after handling the product. Provide eyewash station and safety shower. Handle in accordance with good industrial hygiene and safety practice.

Section 10 – Stability and Reactivity

Reactivity

Stable

Chemical stability

Stable under normal temperature conditions and recommended use.

Conditions to avoid

Avoid high temperatures, open flames, sparks, welding, smoking and other ignition sources. Keep away from strong oxidizers.

Materials to avoid

Keep away from strong oxidizers such as nitric and sulfuric acids.

Incompatible materials

Strong oxidizing agents, Acid chlorides, Acid anhydrides.

Hazardous decomposition products

Risk of explosion. In case of fire hazardous decomposition products may be produced such as: Smoke. Hydrocarbons. Carbon Monoxide and Carbon Dioxide.
Section 11 – Toxicological Information

Information on likely routes of exposure

Ingestion
May be fatal if swallowed and enters airways.

Inhalation
Inhalation of vapors/fumes generated by heating this product may cause respiratory irritation with throat discomfort, coughing or difficulty breathing.

Skin contact
Prolonged contact may cause redness, irritation and dry skin.

Eye contact
May cause eye irritation on direct contact.

Symptoms related to the physical, chemical and toxicological characteristics

Information on toxicological effects

Acute toxicity
Harmful: may cause lung damage if swallowed.

Skin corrosion/irritation
Irritating to skin with redness, pain and dryness.

Serious eye damage/eye irritation
Irritating and may cause damage to eyes with redness and pain.

Respiratory or skin sensitization

Respiratory sensitization
Based on available data, the classification criteria are not met.

Skin sensitization
Based on available data, the classification criteria are not met.

Germ cell mutagenicity
Based on available data, the classification criteria are not met.

Carcinogenicity
Based on available data, the classification criteria are not met.

Reproductive toxicity
Based on available data, the classification criteria are not met.

Specific target organ toxicity (STOT) - single exposure
May cause central nervous system disorders with headache, muscle weakness, dizziness and unconsciousness. May cause respiratory irritation with cough and shortness of breath.

Specific target organ toxicity (STOT) - repeated exposure
May cause liver damage in cases of repeated or prolonged exposure. May cause dryness after repeated and prolonged contact with skin.

Aspiration hazard
If this liquid is swallowed, aspiration into the lungs may result in chemical pneumonitis.

Further information
Symptoms may be delayed.

Section 12 – ECOLOGICAL INFORMATION

Ecotoxicity
Not classified as hazardous to aquatic organisms.

Aquatic Material | Species | Test Results
--- | --- | ---
Isobutanol (CAS 78-83-1) | Fathead minnow | 1,430 mg/l, 96 hours
Fish | Water Flea | 1,220 mg/l, 96 hours
Water Flea | Pseudokirchneriella subcapitata | 1,799 mg/l, 72 hours
Aquatic Plant

Persistence and degradability
Expected low persistence and high degradability. Expected low bioaccumulative potential in aquatic organisms.

Bioaccumulative potential
BCF: 3
Partition coefficient
n-octanol/water (log Kow)
Isobutanol (CAS 78-83-1) – Log Kow 0.76

Mobility in soil
High mobility in soil

Other adverse effects
Not available.

Section 13 – DISPOSAL CONSIDERATIONS

Disposal instructions
Whatever cannot be saved for recovery or recycling should be handled as hazardous waste and sent to a RCRA approved waste facility. Processing, use or contamination of this product may change the waste management options. State and local disposal regulations may differ from federal disposal regulations.

Waste from residues/ unused products
Dispose of container and unused contents in accordance with federal, state and local requirements.

Contaminated Packaging
Empty remaining contents. Do not re-use empty containers. Empty containers should be transported/delivered using a registered waste carrier to local recyclers for disposal. Dispose of container and unused contents in accordance with federal, state and local requirements.

Section 14 – TRANSPORTATION

DOT
Reportable Quantity 5,000 lbs (isobutyl alcohol)
UN number UN1212
UN proper shipping name Isobutanol
Class 3
Transport hazard class(es)
Subsidiary risk -
Packing group III
Special precautions for user Read safety instructions, SDS and emergency procedures before handling.

IATA
UN number UN1212
UN proper shipping name Isobutanol
Class 3
Transport hazard class(es)
Subsidiary risk -
Label(s) 3
Packing group III
Environmental hazards No
Special precautions for user Read safety instructions, SDS and emergency procedures before handling.

IMDG

UN proper shipping name Isobutanol
Class 3
Transport hazard class(es)
Subsidiary risk -
Label(s) 3
Packing group III
Marine pollutant No

Special precautions for user Read safety instructions, SDS and emergency procedures before handling.

This product is a liquid and when transported in bulk is covered under MARPOL 73/78 Annex II.
Section 15 – REGULATORY INFORMATION

US federal regulations This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200. All components are on the U.S. EPA TSCA Inventory List.

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D) Not regulated.

SARA 302 Extremely hazardous substance -Not listed.
SARA 311/312 Hazardous chemical - Yes
SARA 313 (TRI reporting) Not regulated.

Other federal regulations

Clean Air Act (CAA) Section 112 Hazardous Air Pollutants (HAPs) List Not regulated.

Clean Air Act (CAA) Section 112(r) Accidental Release Prevention (40 CFR 68.130) Not regulated.

Safe Drinking Water Act (SDWA) Not regulated.

US. Massachusetts RTK - Substance List
Isobutanol (CAS 78-83-1)

US. New Jersey Worker and Community Right-to-Know Act
Isobutanol (CAS 78-83-1)

US. Pennsylvania Worker and Community Right-to-Know Law
Isobutanol (CAS 78-83-1)

US. California Proposition 65
This product does not contain any chemicals known to the State of California to cause cancer, birth, or any other reproductive defects.

International Inventories

Country(s) or region Inventory name On inventory (yes/no)
Australia Australian Inventory of Chemical Substances (AICS) Yes
Canada Domestic Substances List (DSL) Yes
China Inventory of Existing Chemical Substances in China (IECSC) Yes

Section 16 – OTHER INFORMATION

Prepared By: Gevo Inc.  DATE: May 28, 2015

OTHER INFORMATION: This Material Safety Data Sheet applies to the listed products and synonym descriptions for Hazard Communication purposes only. Technical Specifications vary greatly depending on the products and are not reflected in this document. Consult specification sheets for technical information.

DISCLAIMER: This Material Safety Data Sheet (MSDS) was prepared in accordance with 29 CFR 1910.1200 by Gevo Inc., (“GEVO”). GEVO does not assume any liability arising out of product use by others. The information, recommendations, and suggestions presented in this MSDS are based upon test results and data believed to be reliable. The end user of the product has the responsibility for evaluating the adequacy of the data under the conditions of use, determining the safety, toxicity and suitability of the product under these conditions, and obtaining additional or clarifying information where uncertainty exists. No guarantee expressed or implied is made as to the effects of such use, the results to be obtained, or the safety and toxicity of the product in any specific application. Furthermore, the information herein is not represented as absolutely complete, since it is not practicable to provide all the scientific and study information in the format of this document, plus additional information may be necessary under exceptional conditions of use, or because of applicable laws or government regulations.
